# Global Valuations

What is the Investment Climate?

Price to Earnings (CAPE)

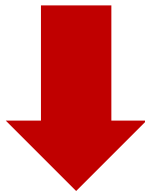

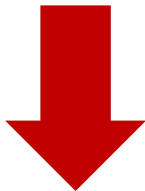

Price to Book Value

**Cyclically Adjusted Price-to-Earnings** or “CAPE” is a valuation metric, where the current market price is divided by the last ten years of average earnings (adjusted for inflation). The price you pay is what you get, and by utilizing average earnings over a longer period (10 years), we can put into perspective whether the current market price is trending toward expensive, undervalued, or fairly valued historically.
